ABOUT THIS BOOKLET

This booklet is the investor-facing entry point to Water Enterprises. It explains the mission, the portfolio logic, the capital plan, and the constraints the team will operate within. More detailed appendices are available on request: technical architecture, legal entity documents, term sheet, product deep-dives, and founding team backgrounds.

FOUNDER NOTE

Water Enterprises is not a feature company. It is an operating company for autonomous infrastructure across enterprise, education, governance, consumer, and robotics. The nine products are designed to reinforce each other: enterprise revenue funds platform development; platform tools accelerate education and social products; social products create trust standards for civic systems; civic systems create demand for physical-world automation and simulation.

WHY NOW

Demand for autonomous labor, education tools, and trusted social infrastructure exceeds accessible supply. Existing solutions are either too expensive, too brittle, or too fragmented. Water Suite turns AI-native capability into predictable recurring revenue at enterprise, consumer, and public-sector price points.

PRODUCT PORTFOLIO

REVENUE ENGINES

WATER COMPANY

B2B autonomous companies-as-a-service. Provides continuous agent hierarchies with built-in governance, queue synchronization, action marketplace, and outcome-based pricing. Target customer: mid-market and enterprise operators who need reliable autonomous labor at scale.

WATER AI

Platform and API layer underlying the suite. Reasoner/Executive dual-model architecture, SDK licensing, and revenue-share hooks into portfolio products. Customers: developers, system integrators, and vendors building on Water infrastructure.

WATER PARTY

Slot and match event platform with crowdfunding, trust protocol, and universal standard enforcement. Distribution-led growth with viral mechanics; hosts convert to community leaders and brand amplifiers.

WATER COACH

On-device executive assistant with local inference, quest-based onboarding, and privacy-first identity. High-margin B2C layer that funds brand, distribution, and data flywheel.

PLATFORM AND IP LEVERAGE

WATER CLASSROOM

Education infrastructure combining AI tutors, live classrooms, student telemetry, and educator tooling. Sold to state education departments and large school networks.

WATER ECONOMICS

Macroeconomic simulation platform for research partners, governments, and institutional investors. Licensed as annual seats plus API access and consulting engagement.

FUTURE INFRASTRUCTURE AND OPTIONALITY

WATER GOV

Civic operating layer for municipalities: permitting, citizen services, and compliance automation.

WATER AI FLUID

Decentralized compute marketplace. Nodes share GPU capacity; the platform collects negotiated fees.

WATER ROBOTICS

Hardware and SaaS stack enabling VR-teleoperated precision machinery. Targeted as a later-stage spinout.

PORTFOLIO SEQUENCING

#	PRODUCT	STAGE	SEED ALLOCATION	TARGET RAISE	TIME TO REVENUE	FOCUS TIER
1	Water Company	Prototype	\$2,800,000	\$5,000,000	Month 4	Revenue engine
2	Water AI	Concept	\$120,000	\$600,000	Month 3	Revenue engine
3	Water Party	Concept	\$75,000	\$800,000	Month 3	Revenue engine
4	Water Coach	Concept	\$60,000	\$400,000	Month 2	Revenue engine
5	Water Classroom	Concept	\$180,000	\$1,000,000	Month 6	Platform leverage
6	Water Economics	Concept	\$95,000	\$500,000	Month 6	Platform leverage
7	Water Gov	Discovery	\$100,000	\$1,500,000	Month 8	Future infrastructure
8	Water AI Fluid	R&D	\$150,000	\$1,200,000	Month 10	Future infrastructure
9	Water Robotics	Research	\$100,000	\$7,000,000	Series A	Future infrastructure

SUITE ECONOMICS

Each product captures a different revenue archetype: enterprise contracts, platform fees, subscription, marketplace transaction fees, civic SaaS, research licensing, and hardware-plus-software. Combined, the portfolio is designed so that success in one product accelerates demand in another.

OPERATING MODEL

Seed execution is designed around velocity, repeatability, and capital discipline. Early hires cover only what is needed to launch revenue engines, prove acquisition, and validate unit economics.

CORE TEAM

FUNCTION	COUNT	COVERAGE	MONTHLY
Engineering	5	CTO + ML + backend + mobile + DevOps	\$93,333
Product & Design	3	PM + UX + designer	\$25,000
Go-to-Market	3	Growth + sales + community	\$30,000
Infrastructure	—	Compute, observability, security	\$16,667
Legal & IP	—	Entity setup, patents, compliance	\$11,111
Operations	—	Accounting, HR, travel, governance	\$8,333

GOVERNANCE

The Stellarium Foundation provides strategic oversight, institutional continuity, and long-term governance guardrails. Water Enterprises operates as the commercial vehicle, with a dedicated board seat for the lead seed investor. Series A will standardize venture governance while preserving observer rights for early backers.

GO-TO-MARKET PLAN

Acquisition is intentionally split between transactional consumer products and high-trust institutional sales.

CONSUMER PLG

Water Party and Water Coach use viral mechanics, affiliate economics, and organic conversion. Coach offers immediate utility; Party creates social proof, community density, and brand amplification. Hosts and early adopters become evangelists and distribution nodes.

ENTERPRISE AND PUBLIC SECTOR

Water Company, Water Classroom, and later Water Gov use founder-led business development, design partner programs, and phased pilots with procurement-ready contracts. Long sales cycles are offset by high switching costs and governance structures embedded in the software itself.

ECOSYSTEM LEVERAGE

Stellarium Foundation relationships provide access to public-sector networks, academic partners, and institutional legitimacy that most seed-stage AI companies do not have.

TECHNOLOGY AND ARCHITECTURE

The suite is built on a common AI substrate instead of isolated products. Shared reasoning, orchestration, and identity layers reduce marginal cost and increase defensibility.

REASONER / EXECUTIVE DUAL MODEL

Water AI exposes a two-layer architecture: a reasoning layer for analysis and planning, and an executive layer for action, consent, and governance. Products such as Water Company and Water Coach consume the same substrate, so improvements propagate across the portfolio.

TRUST AND SAFETY SUBSTRATE

Water Party introduces a trust protocol that becomes the social proving ground for Water Gov and Water Classroom. Identity verification, post-event ratings, and universal standard enforcement are designed as reusable social infrastructure.

ROBOTICS AND PHYSICAL AUTOMATION

Water Robotics is separated because hardware introduces capital intensity, safety, and certification requirements that do not fit the Seed narrative. It is gated until portfolio revenue and funding momentum validate demand.

MARKET AND COMPETITIVE LANDSCAPE

Automation, education, governance, and social infrastructure are each large markets with weak incumbents.

COMPETITIVE MATRICES

DIMENSION	WATER COMPANY	TRADITIONAL RPA	AI AGENT FRAMEWORKS	VERTICAL SAAS
Autonomy	Full 24/7 hierarchies	Scripted, brittle	Single-agent, limited context	None
Collaboration	Multi-agent teams	None	Emerging	None

Year-2 milestones	24	18	\$420K	\$2,500K	+\$2,080K	\$4,605K

Insight: cash-flow breakeven is targeted roughly Months 13–15.

PARTNERSHIP, MILESTONES, AND USE OF FUNDS

STELLARIUM FOUNDATION

The Foundation provides strategic continuity, institutional relationships, governance, and brand trust. Water Enterprises benefits from an existing narrative capital base and alignment structure that most seed-stage companies must build from scratch. This reduces investor agency risk and creates durable alignment.

GOVERNMENT AND INSTITUTIONAL PARTNERSHIPS

Active contexts include USAID DIV, Brazilian municipalities, education secretariats, and research institutions. These relationships accelerate Water Classroom, Water Gov, and Water Economics pilots while creating reference customers with credible renewal behavior.

24-MONTH MILESTONES

MILESTONE	TARGET OUTCOME
Months 1–3	Founding engineering and product team assembled; minimum lovable products in private beta
Months 3–6	First revenue from Water Coach and Water Party; paid pilots for Water Company
Months 6–12	Expansion accounts, renewal motion, and first education deployment
Months 12–18	Positive unit economics across two or more products; defensible acquisition channels
Months 18–24	Series A preparation with audited metrics, customer references, and IP filings

CAP TABLE AND DILUTION

POST-SEED OWNERSHIP AT \$7M ON \$28M PRE

HOLDER	SHARES	OWNERSHIP	INVESTMENT
John Victor	7,000,000	40.0%	—
Stellarium Foundation	2,000,000	11.4%	—
Early Advisors	600,000	3.4%	—
Employee Option Pool	2,000,000	11.4%	—
Seed Investors	5,000,000	28.6%	\$7,000,000
Affiliate Relator Pool	900,000	5.1%	Referral economics

Price per share implied: \$1.40 on a pre-money fully diluted basis.

DILUTION WATERFALL

ROUND	PRE-MONEY	RAISE	POST-MONEY	FOUNDER	SEED	ESOP
Pre-seed	—	—	—	70.0%	—	4.0%
Seed	\$28M	\$7M	\$35M	40.0%	28.6%	11.4%
Series A (est.)	\$100M	\$12M	\$112M	28.6%	39.3%	10.7%
Series B (est.)	\$300M	\$30M	\$330M	20.9%	48.2%	8.7%

Founder retains greater than 20% through Series B. Full pro-rata rights are granted to seed investors. A board observer seat is offered at the seed close.

COMPETITIVE POSITIONING

Water Enterprises competes with automation vendors, AI frameworks, event apps, productivity tools, education platforms, and civic software vendors. The advantage is architectural cohesion rather than isolated features.

COMPETITIVE MATRICES

DIMENSION	WATER COMPANY	TRADITIONAL RPA	AI AGENT FRAMEWORKS	VERTICAL SAAS
Autonomy	Full 24/7 hierarchies	Scripted, brittle	Single-agent, limited context	None
Collaboration	Multi-agent teams	None	Emerging	None
Governance	Built-in board and CEO	External ad hoc	Manual	Manual
Time to value	Hours	Months	Weeks	Months
Pricing	\$2K–\$15K outcome-based	\$15K+ per bot	Dev + compute	\$5K–\$50K/mo
Moat	Dual-model + queue + marketplace + ecosystem	Process	Context window	Industry

RISK REGISTER AND MITIGATION

RISK	LIKELIHOOD	IMPACT	MITIGATION
Dual-model architecture fails	Medium	High	Modular Reasoner/Executive; fallback to single-model; dedicated ML capacity
Enterprise sales delays	High	Medium	Founder-led logos; design partner program; PLG funnel via Coach and Party
Big Tech copy	Medium	High	IP moat; 18-month lead; Stellarium ecosystem lock-in
AI Act and agent liability	Medium	Medium	Legal counsel from Day 1; human-in-the-loop; compliance by design
Talent shortfall	Low	Critical	Competitive equity; Porto Digital ecosystem; remote-first
Series A market downturn	Medium	High	Diversified revenue; path to profitability; 24-month runway
Execution diffusion	High	Critical	Deliberate product sequencing; Seed focuses on revenue engines
Founder dependency	Medium	High	CTO hire Month 1; documented architecture; continuity orders
Reputational exposure	Low	Medium	Clean brand separation and proactive communications

SERIES A REQUIREMENTS

Series A will be raised when the portfolio meets the following targets.

METRIC	TARGET
ARR	\$2.5M–\$5.0M
ARR growth YoY	>3x
Net revenue retention	>115%
Gross margin	>80%
CAC payback	<6 months blended
Paying logos	50+
Team size	15–25 FTE
Revenue-ready products	3–4
Patents filed	2–3+

TARGET SERIES A TERMS

TERM	DETAIL
Raise	\$8M–\$15M
Pre-money	\$80M–\$120M
Post-money	\$88M–\$135M
Step-up from seed	~2.5x–3.4x

CONTACT AND NEXT STEPS

Use this booklet as the curated narrative companion to the full investor data room. The next step is a working session to align on validation priorities, customer introductions, and capital timing.

FOR INVESTORS

Request the data room, technical appendix, and term sheet. Schedule a working session or founder meeting to review go-to-market and partnership pipelines.

FOR AFFILIATES AND PARTNERS

Introduce capital, customers, or implementation partners. Receive 40% cash commission on referred committed capital. Join the investor roster for co-hosted dinners and working sessions.
